# MAC500

## Improved indoor air quality

Poor indoor air quality within rooms we occupy negatively affects our quality of life and health. Unpleasant odours can themselves create discomfort, but indoor air pollution can also be the source of headaches, respiratory problems, fatigue and asthma. **All these problems can be dramatically improved by the use of the MAC500.**

## Odours can be difficult to remove

Even though a room is well-ventilated, odour problems can be difficult to remove. With MAC500, you can permanently solve any odour problems without the use of chemicals. The odour will not return, unless the source of the odour is still present.

## Easy to install

**MAC500 must be installed high in the room** - on a bookshelf, wall or ceiling.

## Technical Data

**UV lamp:** 1x8w

**Power consump:** 25w room area 60m<sup>3</sup>

**Voltage:** 230V

**Operating lamp:** 8000 hours

**Size:** 310mm x 90mm x 90mm
