sanuvent™

UVC Technology

Providing a simple and cost effective solution to **clean air within your home.**

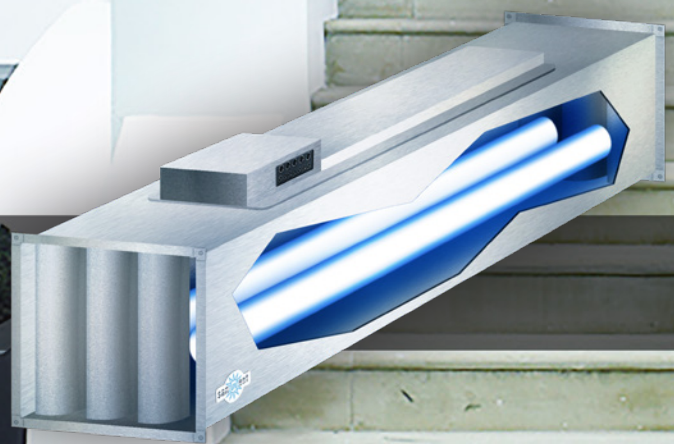

Sanuvent™ is the UK's leading brand in UVC HVAC sterilisation. In partnership with Jimco A/S we provide more than 25 years of experience in UVC and Ozone technology.

Jimco provide a wide range of sterilisation equipment combating viruses and bacteria in a variety of environments. Sanuvent™ has been designed and developed to be able to combat SARS-CoV-2 (Covid -19) and achieving 3-log inactivation. Our system provides a fantastic solution to fit onto your new or existing ventilation system.

We bring the outside environment inside!

It is proven that UVC technology can improve the internal air quality.

A poor indoor climate affects our quality of life and health negatively. Everyone benefits from living in a pleasant, bacteria free space.

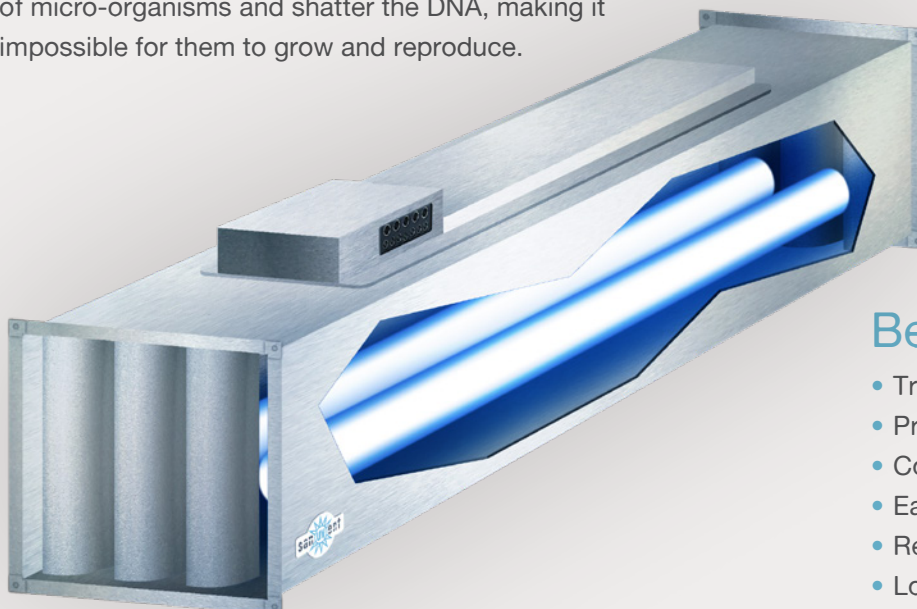

Much focus has been put on to the workplace but why not use this in your home to:

- **IMPROVE** air quality
- **REDUCE** airborne viruses and bacteria
- **REDUCE** illness, headaches and respiratory problems
- **CLEAN** residual odours
- **IMPROVE** general well being

Improved indoor climate = improved work environment

UV light is powerful enough to penetrate the cell walls of micro-organisms and shatter the DNA, making it impossible for them to grow and reproduce.

Benefits of Sanuvent™:

- Tried and tested UV technology
- Proven to viruses and bacteria
- Cost effective solution
- Easy plug and play install (new and retrofit)
- Reduction on odours
- Low running costs
